Product Catalogue for Dietary Supplements

German Company

Have a regular healthy life with
the products of **actomins®**

About Us

ACTO® GmbH manufactures and sells nearly 400 products.

The brand of ACTO® has grown and developed rapidly in the sector by sharing its knowledge and experience that it has obtained for more than 30 years within the all areas of society, especially the health sector, where hygiene is needed.

ACTO® GmbH has professionally produced and sold innovative, competitive and quality products for the Dietary Supplements Market.

Production and analysis processes have been carried out in state-of-the-art clean rooms and laboratories with machinery and equipment in accordance with international laws, regulations, and standards in facilities established with German standards and quality.

Quality and Service Standards

ACTO® GmbH has ISO 9001, ISO 13485, ISO 45001, and ISO 10002 management system certificates.

ACTO® products are manufactured in GMP certified facilities.

ACTO® GmbH implements the quality assurance system effectively in all processes and performs the production of each product according to the highest standard.

Quality Control

Each packaging material, active substance and auxiliary substance used in production processes are tested according to the specified specifications starting from the admission.

While the products that are found suitable as a result of the tests go on through the production process, the unsuitable products are returned or destroyed in accordance with the procedures.

Regardless of the legislation or standard, all products pass the tests determined and validated chemically, physically and microbiologically.

Products that comply with the specified specifications in the semi-product process are transferred to the filling and packaging process.

The finished products go through to the laboratory for analysis before being dispatched.

R&D and Innovation

ACTO® GmbH has an expert R&D team and laboratory that has the required technology to perform all chemical and microbiological tests.

The primary goal of the R&D department is to follow the ever-changing market, to lead the market in the light of scientific data and to develop new products according to customer needs.

The product range is constantly improved and renewed by following new technologies and literatures. Current ideas and techniques in the international market are combined with product experiences from many countries of the world and used as inputs in continuous improvement activities.

Contract Manufacturing

ACTO® GmbH has continued its contract manufacturing activities to produce high quality products with an understanding based on customer satisfaction and good manufacturing practices.

Our production facility, which has an indoor area of approximately 20,000 sqm, has the capacity to quickly respond to the demands of high quantities of products from different sectors with its modern equipment, laboratories and office areas.

Actomins® For Kids D₃

Liquid Dietary Supplement Containing Vitamin D₃

- Offers safe use for children
- Does NOT contain ANY sugar, sweeteners, preservatives, flavors or colorants
- Easy use, thanks to the dropper on the product

Actomins® Vitamin B₁₂

CONTENTS: Vitamin B₁₂ (cyanocobalamin), mannitol, povidone.

Dietary Supplement in Chewable Tablet Form

Actomins® Vitamin B₁₂ is extremely important for human health. Vitamin B₁₂ contributes to energy formation metabolism, normal functioning of the nervous system, normal homocysteine metabolism, psychological functions, red blood cell formation and normal functioning of the immune system.

It helps to reduce fatigue and exhaustion and is involved in cell division.

Actomins Vitamin B₁₂

Vitamin B₁₂ contributes to:

- Normal red blood cell formation,
- Normal function of the immune system,
- Reduction of fatigue and exhaustion,
- Normal energy formation and normal homocysteine metabolism

What are the Symptoms of lack of Vitamin B₁₂ ?

- May affect blood values
- May cause fatigue
- May cause focus problems and attention deficits
- Heart palpitations
- Chills
- Weakness in strenght levels
- Mood disorders
- Mouth ulcers (aphthae)

Usage: It is recommended to take 1 tablet daily. Place it under the tongue or simply chew it.

Vitamin B12 (Cyanocobalamin)	1000 mcg	%40.000

Actomins® Actovir

Dietary Supplement Containing Panax Ginseng and Epimedium Extract

- The creation purpose of the related formulation is to suppress the side effects of the viral infection simultaneously during the reduction of viral load and to inactivate the virus itself directly at the end of the supportive treatment. While the related derivative of the icaride exhibits its antiviral nature through enzyme suppression and structural irreversible damage to the viral structure, panax ginseng does this simultaneously with both immunostimulant quality and direct virucidal action.
- Standardized version of epimedium significantly inhibits the growth of most malignant cells. It also has important antiangiogenesis properties that completely inhibit or eliminate the growth of new malignant cells.
- In addition, it has been reported that *E. brevicornum* and its major bioactive component *icariin* offer a variety of pharmacological actions, including osteoprotection, neuroprotection, cardiovascular protection, anti-inflammation, immunoprotection, and reproductive function.

Daily Dose: It is recommended to take 3 times a day (in the morning, at noon and in the evening) day for 3 days. (Or it is recommended to use it once a day for 9 days.)

Usage: 1 capsule is swallowed with a glass of water (200 ml) at room temperature.
